

THEMBINKOSI MADIBA

Information Systems Graduate | Technology Risk | Cybersecurity | IT Governance

Durban, KwaZulu-Natal • Thembinkosimadiba00@gmail.com • [LinkedIn Profile](#) • [GitHub Profile](#) • [Portfolio](#)

Information Systems graduate with a 73.2% academic average and practical experience in enterprise IT support, digital technologies, and customer-focused service delivery. Passionate about digital innovation, Cybersecurity, AI, cloud technologies, and solving business challenges through technology. A proactive learner with strong analytical thinking, adaptability, and a commitment to delivering meaningful customer and business outcomes. Currently pursuing the CompTIA Security+ certification while continuously developing expertise in cloud security, enterprise risk, and digital consulting.

PROFESSIONAL EXPERIENCE

CAPACITI | IT Support & Technology Trainee

April 2026 | Present

- Deliver first-line technical support across multiple digital communication channels while consistently meeting SLA targets.
- Investigate and resolve software, authentication, account access, and service-related issues in live production environments.
- Manage incidents using Zendesk, ensuring accurate documentation, prioritisation, and timely resolution.
- Analyse recurring customer issues to identify trends and contribute to continuous service improvement initiatives.
- Collaborate with cross-functional teams to enhance customer experience and operational efficiency.
- Selected as Team Leader for multiple CAPACITI projects, coordinating project activities, assigning tasks, monitoring progress, and supporting team members to deliver high-quality outcomes within deadlines.
- Facilitate collaboration between team members, encourage knowledge sharing, and promote a solution-oriented, accountable team culture.

LEADERSHIP ROLE

CAPACITI | Team Leader

- Coordinate project teams, facilitate daily stand-ups, and track delivery against weekly objectives.
- Prepare daily progress reports highlighting completed work, blockers, risks, and mitigation actions.
- Define weekly team goals, monitor progress, and promote accountability and collaboration.
- Support team members in resolving technical and project-related challenges.

Alertnet App | Project Team Leader

- Led the end-to-end delivery of a student safety application.
- Coordinated a multidisciplinary development team and managed project timelines.
- Assigned responsibilities, monitored progress, and ensured successful project completion.
- Presented the final solution and technical approach to academic stakeholders.

CORE COMPETENCIES & SKILLS

- Technology Risk & Governance: Technology Risk Management, IT Governance (COBIT), ISO/IEC 27001, NIST Cybersecurity Framework, General Controls (ITGC), Governance, Risk & Compliance (GRC), Identity & Access Management
- Cybersecurity: Network Security, Active Directory, Azure Entra ID, Windows Administration, Security Awareness, Access Management, Vulnerability Assessment
- Scripting & Automation: Python, PowerShell, Linux, API Integration
